SKILLS

- Leadership & Management
- Digital Transformation
- Project Management
- E-Governance
- Strategic Planning
- Python / Java / C++
- Django / Spring Boot
- Docker / Kubernetes
- Network Design (CCNA)
- Cybersecurity
- Wireshark / Scapy / OWASP
- SQL / PostgreSQL / MongoDB
- Machine Learning / TensorFlow
- AI Logistics Optimization
- Financial Auditing
- Internal Controls
- Payroll Management
- Legal Writing
- Port & Container Operations
- Supply Chain Management
- Customs Clearance
- Blockchain (Ethereum / Hyperledger)

LANGUAGES

Somali ●●●●

English ●●●●○

Arabic ●●○○○

SUMMARY

Results-driven Computer Scientist and strategic leader with an MSc in Computer Science and 15+ years of cross-functional experience in IT infrastructure, maritime operations & logistics, leadership & team management, financial auditing & accounting, and legal writing & regulatory compliance. Proven expertise in leveraging AI and digital technologies to optimize port operations, achieving a 15% reduction in delays and 20% improvement in efficiency. Adept at designing scalable systems, implementing robust controls, and driving digital governance initiatives in dynamic emerging markets.

EXPERIENCE

Jan 2020 — Present

Assistant Operations Manager

Pacific International Lines (PIL), Berbera Port, Somaliland

- Directed daily port operations and high-volume container logistics, coordinating multi-stakeholder teams for seamless throughput and vessel turnaround.
- Designed and implemented an AI-powered real-time shipment tracking system, reducing operational delays by 15%.
- Spearheaded biometric security & monitoring project delivering 20% increase in operational efficiency; recognised by senior management for innovation.
- Maintained 100% compliance with international maritime safety standards, customs regulations, and legal documentation requirements.

Jan 2024 — Jan 2025

Auditing & Accounting Specialist

International Maritime Shipping Services (IMSS)

- Performed comprehensive financial audits, payroll processing, and financial statement analysis for maritime logistics operations.
- Strengthened internal controls and risk management frameworks through detailed compliance reviews and regulatory reporting.
- Prepared high-quality audit documentation and legal correspondence supporting regulatory adherence.

Jan 2019

Admin & Finance Officer

Global ICT Institute of Technology

- Automated financial reporting processes using advanced Excel tools and database integration, significantly improving accuracy and speed.
- Managed accounting records, budgeting support, and internal financial controls.

Jan 2019

Lecturer & Manager — Computer Science

New Generation University College & Horsed Computer Science Institute

- Delivered undergraduate courses in Computer Networking, Cybersecurity, and Systems Administration to 200+ students.
- Received Excellence in Teaching Award for innovative instruction and high student engagement.

2018 — 2019

Commercial Staff

WBH Bill Clark Shipping

- Managed end-to-end shipping documentation, bills of lading, customs clearance, and international trade compliance.
- Drafted and reviewed legal and commercial documentation for smooth cross-border operations.

RESEARCH FOCUS

- Digital Governance Systems
- E-Government Architecture
- Secure Public Digital Infrastructure
- Cybersecurity Policy Integration
- Blockchain for Governance

VOLUNTEER

IT Literacy Coordinator
Hargeisa | 2023–Present

Maritime Safety Volunteer
Berbera Port | 2021–2022

Cybersecurity Awareness
Hargeisa Tech | 2020

KEY ACHIEVEMENTS

- AI tracking → 15% delay reduction
- Biometric system → 25% faster processing
- 20% operational efficiency gain
- Excellence in Teaching Award 2019
- 200+ students impacted
- CCNA top scores — Dhaka 2016

2013 — 2016

Assistant Manager

Dhidar Company

- Led team operations and designed network infrastructure upgrades enhancing system reliability.
- Managed daily administrative and operational processes with a focus on efficiency and team development.

2005

IT & Network Assistant

Africa Online, Hargeisa

- Supported network infrastructure setup, maintenance, troubleshooting, and end-user technical support.

EDUCATION

2016 — 2017

Master of Science in Computer Science

Dhaka International University, Bangladesh

Thesis: "Optimizing Logistics Networks Using AI" · Coursework: Machine Learning, Algorithms, Network Security

2012 — 2015

Bachelor of Science in Computer Science

Admas University, Hargeisa

Focus: Programming, Systems Administration, Computer Science fundamentals

2007 — 2011

GCSE – Secondary Education

Farah Omar Secondary School, Hargeisa

1999 — 2007

PSC – Primary Education

Sheikh Madar Primary School, Hargeisa

CERTIFICATIONS

- **CCNA Routing & Switching** — New Horizon, Dhaka (2016)
- **Data Science** — Cambridge International University, Liverpool (2026)
- **Leadership & Change Management** — Cambridge International University, London (2025)
- **E-Governance & Digital Administration** — Cambridge International University, London (2025)
- **Legal Writing** — Cambridge International University, London (2025)
- **Accounting & Financial Statements** — Cambridge International University, Liverpool (2026)
- **Auditing / Business Accounting / Payroll** — Brazil São Paulo (2026)
- **Human Resource Management** — Cambridge International University, London (2025)
- **MS Excel – Formulas & Functions** — Cambridge International University, London (2025)
- **AI Tools & ChatGPT Master** — Cambridge International University, Liverpool (2026)
- **Building Effective Teaching Strategies** — Cambridge International University, Liverpool (2026)
- **English Language Certificate** — Cambridge International University, Manchester (2026)

TESTIMONIALS

"His expertise in AI for logistics is unmatched."

— Operations Director, PIL

"Khadar inspired students with practical insights into cybersecurity."

— Dean, New Generation University

"Reliable, innovative, and highly professional."

— IT Manager, Dhidar Company

PROFESSIONAL TRAININGS

Shipping & Maritime

Port & Container Handling · Cargo Documentation & Customs Clearance · Maritime Safety & First Aid · Ship & Port Communication Systems · International Trade & Port Coordination · Supply Chain & Logistics Tracking Systems

IT & Networking

Network Security · Advanced Routing & Switching · Cybersecurity · Biometric Systems Management · CCTV Installation · Database Management & SQL · Network Infrastructure Deployment

Auditing, Accounting & Governance

Fundamentals of Business Accounting · Payroll Systems · Auditing Principles & Internal Controls · Financial Statement Analysis · E-Governance & Digital Administration · Leadership & Organizational Development · Legal Documentation & Policy Interpretation

KEY PROJECTS

AI Logistics Tracking Web Application

[Python \(Django\)](#) · [PostgreSQL](#) · [Docker](#) · [JavaScript](#)

Full-stack real-time shipment tracking system integrating GPS data with port systems. Delivered 15% reduction in processing delays and improved cargo visibility for all stakeholders.

AI Logistics Optimizer

[Python](#) · [TensorFlow](#) · [Scikit-learn](#) · [Google Maps API](#)

ML-based tool to predict optimal supply chain routes, reduce fuel consumption, and minimise delays. Developed as part of MSc thesis and piloted at port facilities.

Biometric Security Implementation — Berbera Port

[Biometric Access Control](#) · [CCTV](#) · [Monitoring Systems](#)

Designed and deployed biometric access control and monitoring at Berbera Port. Reduced processing times by 25% and achieved 20% efficiency gains; recognised by Berbera Port Authority (2023).

Network Security Monitoring Tool

[Python](#) · [Scapy](#) · [AWS CloudWatch](#)

Script-based network traffic analyser for real-time vulnerability and anomaly detection, integrated with cloud monitoring for instant alerts and reporting.

RESEARCH & PHD AGENDA

Proposed PhD Title: "Designing Secure and Scalable Digital Governance Architectures for Emerging States"

Research focuses on bridging IT infrastructure and governance systems through secure, scalable, interoperable digital solutions. Methodology includes comparative analysis of EU digital governance systems, systems architecture modelling, cybersecurity risk assessment, and prototype framework development.

Expected Contributions:

- A digital governance reference architecture model for emerging states.
- A cybersecurity-integrated public systems blueprint.
- An adaptable framework for developing and post-conflict states.

TESTIMONIALS

"Khadar's integration of IT solutions into our shipping operations transformed our efficiency. His expertise in AI for logistics is unmatched." — Operations Director, Pacific International Lines

"As a lecturer, Khadar inspired students with practical insights into cybersecurity. His leadership was exemplary." — Dean, New Generation University

"Khadar's network security tools provided robust protection for our systems. Highly reliable and innovative professional." — IT Manager, Dhidar Company
